---

## Overview

Amberfield Partners is a partnership between entrepreneur Ryan Turk and his investor-advisors with the purpose to acquire one U.S.-based private business. Upon acquisition, Ryan will relocate with his family to the local community and devote his full energy to operating the business.

## Mission and Values

Businesses with \$5-\$100M in revenue represent the vast majority of all U.S.-based standalone companies. Many of these businesses are privately owned and operated by families or individuals.

We seek to build on the success and foundation established by the existing ownership. The company acquired by Amberfield will be the only investment and the sole livelihood of the Managing Partner - 100% of our success is linked to the business' success.

We are focused on long term value creation which only happens by taking care of the employees and customers.

"My mission is to be a worthy steward of the people and resources in my life. I believe that leading a small business is a powerful way to better the lives of customers, employees, the community, my partners, and my family. I want to champion the core values of integrity and commitment that I have practiced in my career and life thus far." - Ryan Turk
